PORTLAND, FRIDAY, AUGUST 25, 1885. OREGON PRODUCTS IN THE CALLFOR NIA MARKETS

Manufacture of stoves has been developed by a well-known establishment of this city into a very important industry. Part of the work is done by penal labor. The state receives for the labor of the convicts a sum that goes far toward labor of the convicts a sum that goes far toward supporting the pententiary, and an important manufacturing industry is fostered among us, affording employment also for a large amount of free labor, and turning out a product that controls the market of this region in the one special line. It is solely through partial ublization of penal labor at cheap rates that the proprietors have been able to develop and extendible business. For they are obliged to chapete with the same kind of labor in the east, and can do business here only by heart able to force the do business here only by being able to force the castern product out of this market.

Stove dealers in San Francisco have started a great outery against this Oregon product. They have induced the newspapers of that c ty to publish articles against the sale of "Oregon con-vict made stores" in California. vict made stoves in California. The state nent takes about this form. The Oregon first, by employing convict labor, is enabled to reduce the cost of manufacturing to the intrinum, the stoves made under these circumstances are sent to this city to compete with the product of free labor, and leading stove houses of this city have declined to handle these convict made stoves on the crown that the store of the convict made stoves on the convict made stoves on the convict made store or the convict made store e ground that the sale of prison products is imical to the interests of the community.

This is ad coptandum and, as one might well suppose, there is a fine vem of hypotray in it. Those store houses in San Francisco are fril of stores and other wares made in casteru prisons, but offered on this coast as "products of free labor." There was an attempt to make a oves in San Francisco but to follow the coast as "products of free labor." There was an attempt to make a oves in San Francisco but to follow the coast. labor." There was an attempt to make sloves in San Francisco, but it failed, because the article made by penal labor at Sing Sing and other places could beat the home made article out of the San Francisco market. San Francisco houses therefore go on selling the products of sastern prison labor and try to protect heir trada noninet and foregoon manufactures by deeasiern person more and my my process of the nouncing as "inimical to the interests of the

nouncing as "inimical to the interests of the community" all dealing in prison-made wires. The fact is apparent that this is simply as ex-pedient employed for the purpose of keeping an Oregon product out of the California market. That anything manufactured in Oregon should be offered for sale in California is looked on be offered for sale in California is looked on there as little less than an insult. So long as store-dealers in San Francisco could control the store trade on this coast they could put off the us without excupunction goods made by eastern convect labor, and for years the dealers and toba parity the result of ponal labor there is a chout for "free labor" all along the line But these jealous dealers of Sun Francisco.

though aided by the newspapers of the city, can't keep Oregon stoves out of the california market. Our manufacturers are sending stoves to toat city all the time in increasing quantities. There are plenty of dealers who will handle hem, and their quality and cheapness command them to buyers.

Sen Prancisco wants to trade with Portland,

but wants Portland to be always a bayer. The proud shop-keepers of the Bay city, who for so proud shop-keepers of the Bay city, who for so many rears had the trade of the northwest in their grasp, want only money from 5.544 the bare engrestion that Portland property and goods in San Francisco is resented a. Princh and diagrace. Can any good thing come of of tregor? San Francisco thinks not—excepting always could color to pay for goods bought in always gold coin, to pay for goods bought in San Francisco. This was the old or ier, but it is forever past. If the northwest is going to have any further business relations with the forma the trade most have in 1 a fairer speci process than it ever had to former since \$\frac{1}{2}\$ is iam that the whole object of the outery in ba Francisco against oregon sloves is to keep an Oregon product out of the (altforma market Dealers there want to sell to us, and don't want any product of our manufacture to take this market still less to enter them. A GREAT WRECKING SCHEME One of the tricks of railroad manipulation is well illustrated by the transactions in the case of the South Pennsylvania road, concerning which there have been many detached and to complete bits of information in the news re-

By the action of the postmaster general in cutting off the payments for carrying the ocean mails, the in arests of American trade are made to soffer already. The New Jealand government has heretofore subsidized the Pac.fir Mail Steamship company for bringing the American and British mails. A proposition is now before the New Jealand house of representatives to grant the company \$150,000 per annum for continuance of that service, but since the American government has declined to help his own cultiens the New Jealand authorities herefute to continue the subsidy. English agenus are laboring with much prospect of success to have that som dive tell to their own contrymen, by whom the mails from the United States will now be transported A correspondent of the Martine Fickange, of New York, states that the "An erican trajic interests in New "ea and The South Pennsylvania was intended to form a competing line with the great Pennsylvinia road, running parallel with it from Pritisburg to Harrisburg, at a distance of forty to nfty males south of it. At Harrisburg the new line was connect with the Reading mad which would give it a through line to Philadelphia and New York Ten million dollars, it was estimated, would build the med from Pittening to Harins-burg, a distance of 204 miles. This was a large sum, -about fifty thousand dollars a mile - and the road was to pass much of the way through mountainous districts and was to have double tracks all the way. In Iowa there is a political situation which w 1) Yr Young's statement respecting (three in n in the time reported by selegraph, is in the of feet that in the matter of restriction we must Histories democratic memoring. Hoping to carry the state, that party has male a closs all tance with the greenbackets, and has put the greenback chef, tellette, or the tacket for the team toward governor. Whether is, one of the most test that in the matter of restriction we must deal with England and no with chips. It would be well, pichaps, to deal with thit coun tries, but it should be borne in mind that the Chinese come from China. If emigration from Hong Konz were slopped the Chinese would seen pick up the trick of sailing from shother port. This is a good time to say that Mr Young's diplomatic career has been as that furtenant governor truners in one or the state, strenuous advocates of probibition in the state, while the democrats are bitterly opposed to prohibition, and demand in their platform the repeal of the law. But in order to carry out the fusion with the greenbackers, they had to put dillette on their ticket. So the democrate present the ludicrous spectacle of running an earnest premoter and defender of the prohibitory law on a platform which peremptority demands the repeal of the statute President Cleveland. Nevertheless it is known. and the New York Pork repeats it, that Mr Tilden's requests have received small attention from the president. His recommendations for the appointments it the New York enstome house were outlier disregarded. It comes

INSTRUCTING AN IMMIGRANT.

How One of the Agents of the Immigration Board Told a Stranger about the Beautiful Onegen

F; Senator Corbett, who, it need scarcely be told, is an active member of the board of immigration, has recently built a summer reel-dende about twenty-five miles east of his city, on the line of the O H, & N (o's road, and is often a passeoner on the trains between there and Portland. A few days ago be boarded an unurignant train on its way to Portland, and had hardly taken his seal before a newly on gaged a cent of the immigration board entered the boach and begun his business of esticating visitors for the numigration office. Addressing the ex-sentor's su immigrant, he gave burn a pamphlet setting forth the resources of the country, and entertained him with a verbal lecture upon the c imate, soil, etc., of different sections, and as his listener seemed interested, kincly gave hin a few points of personal advice. "If course," said the young man, "you can tot expect to get right into big things, but if yit have the grit to pitch in with the bleat of growing up with the country, if you are willing to oil up your sleeves and work hard and provided that sort, you out if you are the second and a location ticken-ranging, or something of that sort, you country do better than to find a location right aloig here in the country were passing through. Mr Corbett replied that he had been thinking
of locating on the Columbia river. He expressed himself as highly pleased with what he
had seen of Oregon, and that he had deter
almed he spend his days here. The scenery of
the upper Columbia he thought "grand and imposing beyond anything he had seen elsewhere." His impressions of the climate, too,
were altogether favorable. After adviring Mr

Sevelal Changes a Boundaries of Districts-Open ng Day Wednesday, September 9.

A acating the old Central school has made it necessary to change the subdivisions of the discrete. The special attention of parents and teachers is called to the following boundaries. The Couch and the Palling districts remain unchanged. The North district is enlarged by moving the south boundary to Washington street from the river to 8 street, thence on B to western boundary by the Barnes road.

A new district, has been formed for the Park school as follows. Washington street from the river to B street, thence by Barnes road to the district line on the south, Columbia from the river to Seisenth street, thence to Market, thence to West! Park, thence to Mongomery, thence were on Monig mery and the Terrace road to the tanjon. This is for the grammar department.

The city of London was a great disappointment to me both in appearance and extent, but Paris was a married of interest. In cleantheast and in architectural beauty it easily ranks its more staid and oppulent neighbor. Everything is essentially motion and claborate in design, but the creamy white in which the city is dressed is a bit wearing to the eye. An American finds no difficulty in going about the city, even though he does not "alig the vernaciar" very handly, for English is spiken everywhere. My first expectance with the allen language was at Bologne, where a waiter, in presenting his bill, addressed me in his own longue. My French consisted of only two words, and so I replied in Chinook, to the ever great amazement and discomitance of the presuming heathen. I find that a judicious use of chinook impresses the furposane with the idea that I am a great inguist, and concentrative commands a certain respect and admiration.

The agricultural country of Italy and Frui e The agricultural country of Italy and Frun e new eyry similar, and one notices at once the primitive methods of farming employed, for which, however, the diversity of crops may furnish some excuse. All through Europe great at ention seems to be paid to varying the product of the soil. The farmers are more thrity bere as a class than in America, but it is because of their economy, almost amounting to niggardiness, that they are thrifty. We often hear of the wonderfully cheap living in Europe, and unfavorable comparisons are drawn with America in that regard. I do not find any case for such statements. An American respects himself too highly to live in the manner necessary to insure the vanuate cheapness. It is true that the Italians live cheaply, but so do the thinese in Portland.

WHEAT—The general market continues unsudisfactory, new declines from abroad being cabled
since our last markey report. These must be astributed to causes mentioned then, for oo new positive influences have arisen. English weather has
been such as to favor harvest operations, the yield
proving quite up to all expectations. Added to
this were heavy arrivals of foreign wheat, the last
way weeks in July showing an addition for each

two weeks in July showing an addition to grainary stocks of \$25,000 qrs. The cable has noted free arrivals of coast, and whom mail dates are received they will doubtless attribute declines to large arrivals, dull demand and fine harvest weather. Last mail dates dweet upon the great difficulties in the way of further declines because of the great abortions of the great of the grea difficulties in the way of further dections because of the general sbortness of the crops of this year, bit pointed out that accomulations must be worked off before any value improvement could take place. For two weeks ending the 2d inst. imports of wheat and four into the United Kingdom were [117,000 erg., but the quantity affect was keet well up by reason of freer shipments from findla, that country now sending over 100,000 qrs per week. Other countries are doing little in the way of keep-ing the quantity affect. g the quantity offest. New York and Chleago have fallen away in price

s much because of local conditions as of foreign sports. Were it not for the first named no such sherr own way for the time real being embodened by successor. The buil crowd are confident that their farm will soon come. Both are putting out figures, the first placing carry over stock in this country at 150,000,000 bushels, the last claiming only 20,000,000 tushels below the receives will be 200,000,000 bushels below last year. All this figure work simply represents ideas high by the two elements in the tradio. To the artrage scher it is enough to believe there is ashortage the world over and that it should bring him some gain. In this belief he is langing back as strongly as populative.

trading obtained up to one week ago. As the Bai rancisco market falled to develop positive wear ess our own has been upheld. for there is continu ness our own has been upheld for there is continu-ally sense appearumly for selling away from home, Reference was made has week to the fact that San-Francisco braders were industriously at work in this field, presumably to fill option sates. It has since been stated that Walla Walla could not be delivered against No. I California, there being a difference of to per cental in favor of the latter, but that late purchases or contracts were for spot relating, our wheat bringing \$1.35 there readily. There is thus a very fair profit in legalimate trad-ing. Something like \$500 tons Walla Walla has been contracted for, and with a steady movement in other way, all freight room is filled. Some of our city houses are liberal shippers but mostly on commission. It is known that figures above what can be quoted here have been paid in the Walla Walla section for San Francisco secount, and also that local buyers have actually efferted mere than they will quote here or are justified in poytur against prior strival char-

choice, which is rather above the market, but this is frequently done early in the season when their values will stand. It. Ambitious warehousement often found doing it as an attraction, as it tris is the shippers' idea and shipment value for valley that should probably be quoted. Walta Walla grades are quoted it 1021 12% for shipment in high-priord vassels, but as freights now nonitably are, \$1 i5 would not be far out of the way.
